

Task Guide A04

Introduction and setup project

1. Objective

Student learn how to make Instagram's home screen story list

2. Requirement

Hardware:

- 4 GB RAM minimum, 8 GB RAM recommended
- 15 GB of available disk space minimum (2 GB for Flutter SDK, 8 GB for Android Studio, 4 GB for AVD, and 1 GB for project's size)
- 1280 x 800 minimum screen resolution
- Intel processor with support for Intel VT-x, Intel EM64T (Intel 64), and Execute Disable (XD) Bit functionality

Software:

- Microsoft Windows 7/8/10/11 (64-bit)
- JDK 8
- Android Studio IDE
- Git

3. Resource

Starter project code : <https://github.com/chrisdionisius/clone-instagram-login.git>

4. Task Description

In this task, student will be implementing a clone of Instagram's home page post list using Flutter and various widgets such as StatefulWidget, Scaffold, Column, Container, and more. This exercise will help student understand how to structure a Flutter application, utilize different widgets, and build a user interface resembling Instagram's home page post list.

Specification

- 1) Clone project from <https://github.com/chrisdionisius/clone-instagram-login/tree/Refactoring> (make sure clone it from code-starter branch) or using the manual setup if you encounter error during cloning project, refer to Guide A.01
- 2) Run flutter pub get in the terminal or if you are using Microsoft Visual Studio Code you could click on **Get Package** button.
- 3) Using this specification make a list of some widgets below :
 1. Open post_item.dart file under directory lib\app\widgets and make sure if PostItem widget is extended from StatelessWidget

```
import 'package:flutter/material.dart';

class PostItem extends StatelessWidget {
  const PostItem({
    super.key,
  });

  @override
  Widget build(BuildContext context) {
    throw UnimplementedError();
  }
}
```

2. Add this import to post_item.dart file

```
import 'package:flutter/material.dart';
import 'package:flutter_svg/flutter_svg.dart';
```

3. Add this parameter to PostItem class

```
final String profileImg;
final String name;
final String postImg;
final String caption;
final bool isLoved;
final String likedBy;
final String viewCount;
final String dayAgo;
final String userPhoto;

const PostItem({
  super.key,
  required this.profileImg,
  required this.name,
  required this.postImg,
  required this.caption,
  required this.isLoved,
  required this.likedBy,
  required this.viewCount,
  required this.dayAgo,
  required this.userPhoto,
```

```
});
```

```
class PostItem extends StatelessWidget {  
  final String profileImg;  
  final String name;  
  final String postImg;  
  final String caption;  
  final bool isLoved;  
  final String likedBy;  
  final String viewCount;  
  final String dayAgo;  
  final String userPhoto;  
  
  const PostItem({  
    super.key,  
    required this.profileImg,  
    required this.name,  
    required this.postImg,  
    required this.caption,  
    required this.isLoved,  
    required this.likedBy,  
    required this.viewCount,  
    required this.dayAgo,  
    required this.userPhoto,  
  });  
  
  @override  
  Widget build(BuildContext context) {  
    throw UnimplementedError();  
  }  
}
```

4. Add Padding widget as a return following this specifications

No	Widget	Property	Value
1	Padding	key	Key('post_item_padding')
		padding	EdgeInsets.only(bottom: 10)
		child	Column(key: const Key('post_item_column')
Column(key: const Key('post_item_column') properties :			
2	Column	key	Key('post_item_column')
		crossAxisAlignment	CrossAxisAlignment.start
		children	[]

```
return Padding(  
  key: const Key('post_item_padding'),  
  padding: const EdgeInsets.only(bottom: 10),  
  child: Column(  
    key: const Key('post_item_column'),  
    crossAxisAlignment: CrossAxisAlignment.start,  
    children: [],  
  ),  
);  
}
```

ADDING POST'S USER INFO

5. Check on Column widget with key `post_item_column`, add Container widget as children following this specification:

No	Widget	Property	Value
3	Container	key	Key('post_item_user_info_container')
		padding	EdgeInsets.symmetric(vertical: 10, horizontal: 15)
		margin	EdgeInsets.only(bottom: 12)
		child	Row(key: const Key('post_item_user_info_row')
Row(key: const Key('post_item_user_info_row') properties :			
4	Row	key	Key('post_item_user_info_row')
		mainAxisAlignment	MainAxisAlignment.spaceBetween
		children	Container(key: Key('post_item_user_profile_img_container'), Expanded(key: Key('post_item_user_name_expanded'), Icon(key: Key('post_item_user_more_icon'))
Container(key: Key('post_item_user_profile_img_container') properties :			
5	Container	key	Key('post_item_user_profile_img_container')
		width	40
		height	40
		margin	EdgeInsets.only(right: 15)
		decoration	BoxDecoration(shape: BoxShape.circle, image: DecorationImage(image: NetworkImage(profileImg), fit: BoxFit.cover,))
Expanded(key: Key('post_item_user_name_expanded')) properties :			
6	Expanded	key	Key('post_item_user_name_expanded')
		child	Text(key: const Key('post_item_user_name_text')
Text(key: const Key('post_item_user_name_text') properties :			
7	Text	key	Key('post_item_user_name_text')
		value	name
		style	TextStyle(color: white, fontSize: 15, fontWeight: FontWeight.w500)
Icon(key: Key('post_item_user_more_icon')) properties :			
8	Icon	key	Key('post_item_user_more_icon')
		value	Icons.more_horiz
		color	white

```
Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    Container(
      key: const Key('post_item_user_info_container'),
```

```

padding: const EdgeInsets.symmetric(vertical: 10, horizontal: 15),
margin: const EdgeInsets.only(bottom: 12),
child: Row(
  key: const Key('post_item_user_info_row'),
  mainAxisAlignment: MainAxisAlignment.spaceBetween,
  children: <Widget>[
    Container(
      key: const Key('post_item_user_profile_img_container'),
      width: 40,
      height: 40,
      margin: const EdgeInsets.only(right: 15),
      decoration: BoxDecoration(
        shape: BoxShape.circle,
        image: DecorationImage(
          image: NetworkImage(profileImg),
          fit: BoxFit.cover,
        ),
      ),
    ),
    Expanded(
      key: const Key('post_item_user_name_expanded'),
      child: Text(
        key: const Key('post_item_user_name_text'),
        name,
        style: const TextStyle(
          color: white,
          fontSize: 15,
          fontWeight: FontWeight.w500,
        ),
      ),
    ),
    const Icon(
      key: Key('post_item_user_more_icon'),
      Icons.more_horiz,
      color: white,
    )
  ],
),
),
)

```

ADDING POST'S IMAGE

- Still on Column widget with key `post_item_column`, add another Container widget as children following this specification:

No	Widget	Property	Value
9	Container	key	Key('post_item_image_container')
		height	400

		margin	EdgeInsets.only(bottom: 10)
		decoration	BoxDecoration(image: DecorationImage(image: NetworkImage(postImg), fit: BoxFit.cover,),)

```
Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...
    Container(
      key: const Key('post_item_image_container'),
      height: 400,
      margin: const EdgeInsets.only(bottom: 10),
      decoration: BoxDecoration(
        image: DecorationImage(
          image: NetworkImage(postImg),
          fit: BoxFit.cover,
        ),
      ),
    ),
  ],
)
```

ADDING POST'S ITEM ACTION BUTTONS

7. Still on Column widget with key post_item_column, add another Container widget as children following this specifications :

No	Widget	Property	Value
10	Container	key	Key('post_item_actions_container')
		padding	EdgeInsets.fromLTRB(15, 3, 15, 0)
		margin	EdgeInsets.only(bottom: 12)
		child	Row(key: const Key('post_item_actions_row'))
Row(key: const Key('post_item_actions_row')) properties :			
11	Row	key	Key('post_item_actions_row')
		mainAxisAlignment	MainAxisAlignment.spaceBetween
		children	Row(key: const Key('post_item_actions_left_row'), SvgPicture.asset("assets/images/save_icon.svg", key: const Key('post_item_actions_save_icon'), width: 27,))
Row(key: const Key('post_item_actions_left_row')) properties :			
12	Row	key	Key('post_item_actions_left_row')
		children	SvgPicture.asset(key: const Key('post_item_actions_love_icon'),)

			<pre> width: 27 isLoved? "assets/images/loved_icon.svg" : "assets/images/love_icon.svg"), SizedBox(width:20), SvgPicture.asset("assets/images/comment_icon.svg", key: const Key('post_item_actions_comment_icon'), width: 27), SizedBox(width: 20), SvgPicture.asset("assets/images/message_icon.svg", key: const Key('post_item_actions_message_icon'), width: 27), </pre>
--	--	--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

```

Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...
    Container(
      key: const Key('post_item_actions_container'),
      padding: const EdgeInsets.fromLTRB(15, 3, 15, 0),
      margin: const EdgeInsets.only(bottom: 12),
      child: Row(
        key: const Key('post_item_actions_row'),
        mainAxisAlignment: MainAxisAlignment.spaceBetween,
        children: <Widget>[
          Row(
            key: const Key('post_item_actions_left_row'),
            children: <Widget>[
              SvgPicture.asset(
                key: const Key('post_item_actions_love_icon'),
                isLoved
                  ? "assets/images/loved_icon.svg"
                  : "assets/images/love_icon.svg",
                width: 27,
              ),
              const SizedBox(width: 20),
              SvgPicture.asset(
                "assets/images/comment_icon.svg",
                key: const Key('post_item_actions_comment_icon'),
                width: 27,
              ),
              const SizedBox(width: 20),
              SvgPicture.asset(
                "assets/images/message_icon.svg",
                key: const Key('post_item_actions_message_icon'),

```

```

        width: 27,
      ),
    ],
  ),
  SvgPicture.asset(
    "assets/images/save_icon.svg",
    key: const Key('post_item_actions_save_icon'),
    width: 27,
  ),
],
),
),
)

```

ADDING POST'S ITEM LIKES INFORMATION

8. Still on Column widget with key `post_item_column`, add another Container widget as children following this specifications :

No	Widget	Property	Value
19	Container	key	Key('post_item_likes_container')
		padding	EdgeInsets.symmetric(horizontal: 15)
		margin	EdgeInsets.only(bottom: 12)
		child	RichText(key: const Key('post_item_likes_rich_text'))
20	RichText	key	Key('post_item_likes_rich_text')
		text	TextSpan(children: [TextSpan(text: "Liked by \$likedBy and Other", style: const TextStyle(fontSize: 15, fontWeight: FontWeight.w500,),),],)

```

Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...
    Container(
      key: const Key('post_item_likes_container'),
      padding: const EdgeInsets.symmetric(horizontal: 15),
      margin: const EdgeInsets.only(bottom: 12),
      child: RichText(
        key: const Key('post_item_likes_rich_text'),
        text: TextSpan(

```

```

        children: [
          TextSpan(
            text: "Liked by $likedBy and Other",
            style: const TextStyle(
              fontSize: 15,
              fontWeight: FontWeight.w500,
            ),
          ),
        ],
      ),
    ),
  ],
),
),
)

```

ADDING POST'S CAPTION

9. Still on Column widget with key `post_item_column`, add another Container widget as children following this specifications :

No	Widget	Property	Value
21	Container	key	Key('post_item_caption_container')
		padding	EdgeInsets.symmetric(horizontal: 15)
		margin	EdgeInsets.only(bottom: 12)
		child	RichText(key: const Key('post_item_caption_rich_text')
RichText(key: const Key('post_item_caption_rich_text') properties :			
22	RichText	key	Key('post_item_caption_rich_text')
		text	TextSpan(children: [TextSpan(text: "\$name ", style: const TextStyle(fontSize: 15, fontWeight: FontWeight.w700)), TextSpan(text: caption, style: const TextStyle(fontSize: 15, fontWeight: FontWeight.w500),),],)

```

Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...

```

```

Container(
  key: const Key('post_item_caption_container'),
  padding: const EdgeInsets.symmetric(horizontal: 15),
  margin: const EdgeInsets.only(bottom: 12),
  child: RichText(
    key: const Key('post_item_caption_rich_text'),
    text: TextSpan(
      children: [
        TextSpan(
          text: "$name ",
          style: const TextStyle(
            fontSize: 15, fontWeight: FontWeight.w700),
        ),
        TextSpan(
          text: caption,
          style: const TextStyle(
            fontSize: 15, fontWeight: FontWeight.w500),
        ),
      ],
    ),
  ),
),
]),

```

ADDING POST'S COMMENTS COUNT

10. Still on Column widget with key post_item_column, add another Container widget as children following this specifications :

No	Widget	Property	Value
23	Container	key	Key('post_item_view_comments_container')
		padding	EdgeInsets.symmetric(horizontal: 15)
		margin	EdgeInsets.only(bottom: 12)
		child	Text(key: const Key('post_item_view_comments_text'))
24	Text	key	Key('post_item_view_comments_text')
		value	"View \$viewCount comments"
		style	TextStyle(color: white.withOpacity(0.5), fontSize: 15, fontWeight: FontWeight.w500)

```

Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...
    Container(
      key: const Key('post_item_view_comments_container'),

```

```
padding: const EdgeInsets.symmetric(horizontal: 15),
margin: const EdgeInsets.only(bottom: 12),
child: Text(
  key: const Key('post_item_view_comments_text'),
  "View $viewCount comments",
  style: TextStyle(
    color: white.withOpacity(0.5),
    fontSize: 15,
    fontWeight: FontWeight.w500),
),
),
]),
```

ADDING POST'S ADD-COMMENTS

11. Still on Column widget with key post_item_column, add another Container widget as children following this specifications :

No	Widget	Property	Value
24	Container	key	Key('post_item_add_comment_container')
		padding	EdgeInsets.symmetric(horizontal: 15)
		margin	EdgeInsets.only(bottom: 12)
		child	Row(key: const Key('post_item_add_comment_row')
Row(key: const Key('post_item_add_comment_row') properties :			
25	Row	key	Key('post_item_add_comment_row')
		mainAxisAlignment	MainAxisAlignment.spaceBetween
		children	Row(key: const Key('post_item_add_comment_left_row'),) Row(key: const Key('post_item_add_comment_right_row'),)
Row(key: const Key('post_item_add_comment_left_row') properties :			
26	Row	key	Key('post_item_add_comment_left_row')
		children	Container(key: Key('post_item_add_comment_avatar_container')) Text (key:Key('post_item_add_comment_text'))
Container(key: Key('post_item_add_comment_avatar_container')) properties :			
27	Container	key	Key('post_item_add_comment_avatar_container')
		width	30
		height	30
		margin	EdgeInsets.only(right: 15)
		decoration	BoxDecoration(shape: BoxShape.circle, image: DecorationImage(image: NetworkImage(userPhoto), fit: BoxFit.cover))
Text (key:Key('post_item_add_comment_text')) properties :			

28	Text	key	Key('post_item_add_comment_text')
		value	"Add a comment..."
		style	TextStyle(color: white.withOpacity(0.5), fontSize: 15, fontWeight: FontWeight.w500)
Row(key: const Key('post_item_add_comment_right_row')) properties :			
29	Row	key	Key('post_item_add_comment_right_row')
		children	Text(key: Key('post_item_add_laugh_emoji_text'), SizedBox(width: 10), Text(key: Key('post_item_add_love_emoji_text')) SizedBox(width: 10), Icon(key: Key('post_item_add_circle_icon'))
Text(key: Key('post_item_add_laugh_emoji_text')) properties :			
30	Text	key	Key('post_item_add_laugh_emoji_text')
		value	"😂"
		style	TextStyle(fontSize: 20)
Text(key: Key('post_item_add_love_emoji_text')) properties :			
32	Text	key	Key('post_item_add_love_emoji_text')
		value	"💕"
		style	TextStyle(fontSize: 20)
Icon(key: Key('post_item_add_circle_icon')) properties :			
34	Icon	key	Key('post_item_add_circle_icon')
		value	Icons.add_circle
		color	white.withOpacity(0.5)
		size	18

```

Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...
    Container(
      key: const Key('post_item_add_comment_container'),
      padding: const EdgeInsets.symmetric(horizontal: 15),
      margin: const EdgeInsets.only(bottom: 12),
      child: Row(
        key: const Key('post_item_add_comment_row'),
        mainAxisAlignment: MainAxisAlignment.spaceBetween,
        children: <Widget>[
          Row(
            key: const Key('post_item_add_comment_left_row'),
            children: <Widget>[
              Container(
                key: const
Key('post_item_add_comment_avatar_container'),
                width: 30,
                height: 30,

```

ADDING POST'S DAY AGO

12. Still on Column widget with key `post_item_column`, add Padding widget as children following this specifications :

No	Widget	Property	Value
35	Padding	key	Key('post_item_day_ago_padding')
		padding	EdgeInsets.symmetric(horizontal: 15)
		child	Text(key: const Key('post_item_day_ago_text'))
Text(key: const Key('post_item_day_ago_text')) properties :			
36	Text	key	Key('post_item_day_ago_text')
		value	dayAgo
		style	TextStyle(color: white.withOpacity(0.5), fontSize: 15, fontWeight: FontWeight.w500)

```
Column(
  key: const Key('post_item_column'),
  crossAxisAlignment: CrossAxisAlignment.start,
  children: <Widget>[
    ...
    Padding(
      key: const Key('post_item_day_ago_padding'),
      padding: const EdgeInsets.symmetric(horizontal: 15),
      child: Text(
        key: const Key('post_item_day_ago_text'),
        dayAgo,
        style: TextStyle(
          color: white.withOpacity(0.5),
          fontSize: 15,
          fontWeight: FontWeight.w500,
        ),
      ),
    ),
  ],
)
```

13. Move to `home_page.dart` file and add this import so that `PostItem` widget will be accessible from this page

```
import 'package:example_widget_testing/app/widgets/post_item.dart';
```

14. Move to Column widget with key `home_page_column`, add another Column widget as it's children following this specifications:

No	Widget	Property	Value
15	Column	Key	Key('posts_column')
		children	List.generate(widget.posts.length, (index) { return PostItem(key: Key('post_item_\$index'),

			<pre> postImg: widget.posts[index]['postImg'], profileImg: widget.posts[index]['profileImg'], name: widget.posts[index]['name'], caption: widget.posts[index]['caption'], isLoved: widget.posts[index]['isLoved'], viewCount: widget.posts[index]['commentCount'], likedBy: widget.posts[index]['likedBy'], dayAgo: widget.posts[index]['timeAgo'], userPhoto: profile.profilePic!,); },) </pre>
--	--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

```

Column(
  key: const Key('home_page_column'),
  children: <Widget>[
    ...
    Column(
      key: const Key('posts_column'),
      children: List.generate(
        widget.posts.length,
        (index) {
          return PostItem(
            key: Key('post_item_$index'),
            postImg: widget.posts[index]['postImg'],
            profileImg: widget.posts[index]['profileImg'],
            name: widget.posts[index]['name'],
            caption: widget.posts[index]['caption'],
            isLoved: widget.posts[index]['isLoved'],
            viewCount: widget.posts[index]['commentCount'],
            likedBy: widget.posts[index]['likedBy'],
            dayAgo: widget.posts[index]['timeAgo'],
            userPhoto: profile.profilePic!,
          );
        },
      ),
    ),
  ],
)

```

15. Run the project and check if there's no error it will return login page similar like this.

Testing

- 1) Open home_page_test.dart file under test folder
- 2) Find main method it will look similar like this

```
24
25 void main() {
26   testWidgets('Check if home page is present', (WidgetTester tester) async {
27     FlutterError.onError = ignoreOverflowErrors;
28
29     await mockNetworkImagesFor(
30       () => tester.pumpWidget(
31         MaterialApp(
32           home: HomePage(
33             posts: posts, profileData: profileJson, stories: stories), // HomePage
34         ), // MaterialApp
```

- 3) Click Run
- 4) If there's an error while running the test, especially around line 1013 onward simply press close to remove the warning

```
1013 > testWidgets('Check if Bottom NavBar is present', (WidgetTester tester) async { 'package:flutter_t
'package:flutter_test/src/binding.dart': Failed assertion: line 903 pos 14: '_pendingExceptionDetails != null': A ... Check if ...
or had unexpected additional errors that it could not handle. Typically, this is caused by using expect
() before restoring FlutterError.onError.
dart:core _AssertionError._throwNew
package:flutter_test/src/binding.dart 903:14 TestWidgetsFlutterBinding._runTest.
handleUncaughtError
package:flutter_test/src/binding.dart 908:9 TestWidgetsFlutterBinding._runTest.<fn>
dart:asvnc CustomZone.runUnaryv
```

- 5) At the moment not all test are passed since we've not finished implementing home page, just make sure these 7 test are passed

```
✓ Check if home page is present
✓ Check if Home page AppBar is present
✓ Check if Story is present
✓ Check if StoryItem rendered correctly
✓ Check if divider is present
✓ Check if Posts Column is present
Ignored Error
✓ Check if PostItem rendered correctly
```

- 6) If there is an error try to check the message and fix the error usually It's because of wrong key name or missing property of specific widget
